

# Quality Policy and Environmental Management

**Ed.13**

The Management of CATHMEDICAL CARDIOVASCULAR has implemented and maintains a Quality Management System based on the requirements of the UNE-EN-ISO 9001 standards: "Quality Management Systems", UNE-EN ISO 13485: "Health Products and Systems of quality management".

The Quality Management System covers the activities of:

**“Marketing and Import of medical products and medical products for in vitro diagnosis, Installation, maintenance and repair of Medical-Surgical devices, Design and Development of Software for Cardiac Physiomonitring Systems and Grouping of Medical products”**

The QUALITY and ENVIRONMENTAL MANAGEMENT Policy of CATHMEDICAL CARDIOVASCULAR is based on the following commitments:

1. **Commitment to comply with all the requirements, whether legal, regulatory, contractual or of another nature, that are applicable to us due to our activity, in the scope of the performance of our services**, so that our actions in no case can contravene the legal requirements and specifications established by the different public administrations.
2. **Compliance with legal and regulatory requirements** that apply due to our activity in the environmental field.
3. **Consolidate the incorporation of state-of-the-art equipment and Commitment to carry out our work within a management environment that guarantees maintenance and continuous improvement** in our processes, in our methods of action and in our relationships with interested parties, through the establishment and regular review of our quality objectives.
4. **Commitment to promote an understanding and dissemination of our quality and environmental management policy within our organization**, through training and ongoing communication with our staff.
5. **Protection of the environment** through actions and measures aimed at preventing any environmental alteration that could be caused by our activities, especially in relation to the production of hazardous waste, promoting the minimization of its generation and recycling, and in the consumption of energy and raw materials making efficient use of them.
6. **Commitment to make available and make public our quality and environmental management policy for interested parties**, for their knowledge.
7. **Ensure the satisfaction of our customers in terms of compliance with all requirements.**
8. **Procure the necessary means to be able to adapt to the requirements of our clients in a dynamic, changing and competitive environment.**
9. **Have staff with the necessary training and sufficient motivation**, achieve process improvement and guide these towards customer and staff satisfaction.
